

DAIRY FARMING TRAINING AT FARM & COMMUNITY TECHNOLOGIES LTD

Animals

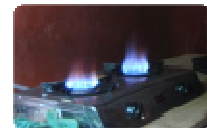

Milk

Calves

Manure

Biogas

The monthly training session on Dairy farming organised by Farm & Community Technologies Ltd (FACT Ltd) commenced in July 2012. The sessions have been held successfully once every month since then due and have proved to be highly popular with aspiring investors in dairy farming. F.a C T Ltd thank those who have participated in this training for giving us the opportunity. F a .C .T Ltd is fully committed to giving value for money and determined to empower you as an aspiring investor in dairy farming to move you further towards achieving your dreams. The programme is usually organised with a theory training that covers the basics/ fundamentals of dairy enterprise management followed by a visit to a dairy farm in Thika. We have partnered with Este Farm to provide a comprehensive training that covers every aspect of what you need to know to succeed in dairy farming and associated value chains. The topics covered during theory and the field visit include housing and structures, breeds, reproduction, management at different stages of animal growth, health, marketing/value addition, and many other issues. We support our trainees with follow up support and advise as need may arise.

For enquiries on dates for future trainings or any other matter please contact 0706624605; email.infofact@elewa.org. We are on Facebook at Below are some pictures of training sessions.
